Ye Wang

Product Designer | UX Design Engineer
Austin, TX | (213) 378-3391 | yewang1990@gmail.com | yewangdesign.com

Most of what I'm handed is an incomplete or slightly off problem — a brief built on the wrong hierarchy, a sitemap that's flat where it should branch, a constraint no one wrote down. My work starts by figuring out what's actually being asked before I try to answer it, then owning the judgment calls that follow: what to design against, what to trade off now versus later, and how far to dig before accepting an explanation.

WORK EXPERIENCE

Visa Inc., Austin, TX *2020 – 2026*
Sr. UX Design Engineer

- **Prototyping & AI-Assisted Frontend Debugging:** Designed a 0-to-1 partner portal solo, then worked alongside a 4-person AEM authoring team through implementation — using Claude and Cline to author custom HTML/CSS via the RTE where default components fell short, and tracing a cross-environment icon-rendering bug to an asset path that had never been mirrored between Lower and Higher environments.
- **Human-in-the-Loop Decision Support (0-to-1):** Owned end-to-end design as the sole designer of a self-serve dispute-management platform in a regulated financial workflow, with no existing product to react to. Designed a real-time AI confidence signal that updates as users add evidence, plus a governance layer that lets a second role control when the AI engages.
- **Design System & Accessibility:** Revamped core, state-heavy components to WCAG 2.1 AA, rebuilt contrast tokens, 400% reflow behavior, and keyboard/ARIA states, established the accessibility baseline inherited by every product across the sub-brand.

Baozun eCommerce Inc., Shanghai *2019 – 2020*
Sr. UX Designer

- **Cross-Border E-commerce Localization**: Led a 0-to-1 redesign of Microsoft (HK)'s e-commerce site, diagnosing navigation, redundancy, and filtering issues across Landing, PDP, and PLP. **Result:** full site revamp shipped and validated post-launch against navigation clarity, speed, and conversion goals.
- **End-to-End Delivery**: Ran the full research-to-handoff pipeline and bridged business stakeholders and the development team through implementation.

Freelance Design Consultant, Los Angeles, CA *2015 – 2018*
Graphic Designer

- Designed end-to-end brand identities for multi-industry clients, consulted founders on visual storytelling, and guided strategic positioning across market trends.

TECHNICAL SKILLS

UX/Product Strategy: Information Architecture (IA), Complex B2B Systems, AI-Native Conversational UI, User Research, Journey Mapping, Rapid Prototyping, Usability Testing.

UI & Visual Craft: Design Systems, Data Visualization, High-Density Dashboards, Accessibility (2.1).

Frontend & Design Engineering: HTML/CSS, AEM (RTE-based custom authoring), Git, Vercel, Responsive Web Design.

Design Tools & AI Stack: Figma, Claude, Cline, Stitch, Photoshop, Illustrator, Adobe Creative Suite.
